

Field	Details
Date	19 July 2026
Team ID	SB-AIML-2026-0042
Project Name	Emotion Detector - AI-Driven Emotion Detection & Personalized Learning Support P
Maximum Marks	3 Marks

Persona: Arjun - Frustrated Engineering Student

Journey Stages

Stage 1: Awareness

Trigger: Arjun is stuck on a topic and types a distressed message into a search engine.

Touchpoints: Search engine, social media, college notice board

Emotions: Frustrated, overwhelmed

Pain Points: No search result understands his emotional state - only returns textbook links

Opportunity: Introduce Emotion Detector via college EdTech portal

Stage 2: Discovery

Action: Arjun finds the Emotion Detector Streamlit app via a shared link.

Touchpoints: Streamlit public URL

Emotions: Curious but skeptical

Pain Points: Not sure if the tool will actually help

Opportunity: Simple, welcoming UI with a clear call-to-action text box

Stage 3: First Use

Action: He types: "I've been trying to understand pointers in C for 3 hours and nothing makes sense. I want to give up."

Touchpoints: Streamlit text area Detect Emotion button

Emotions: Frustrated (detectable from text)

Pain Points: Slight hesitation - is this safe to share?

Opportunity: Clear privacy note; no login required

Action: System processes input through Gemini AI + Rule-Based Engine

Result: Emotion detected: Frustrated (87% confidence)

Touchpoints: Emotion card, confidence bar chart, keyword tags

Emotions: Surprised and validated - "It actually understood how I feel!"

Pain Points: None

Opportunity: Display empathetic message alongside the emotion result

Stage 5: Personalized Guidance

Action: System generates Gemini-powered personalized guidance

Output: 5-section response - Acknowledgement, Resources, Study Techniques, Break Suggestions, Encouragement

Touchpoints: Guidance panel

Emotions: Relieved, hopeful

Pain Points: Long text may feel overwhelming

Opportunity: Structured sections with icons make it scannable

Stage 6: Continued Use

Action: Arjun bookmarks the app and uses it in future study sessions

Touchpoints: Analytics Dashboard (session history)

Emotions: Confident - tracks emotional progress over time

Pain Points: None

Opportunity: Show emotion trends over time for self-awareness

Journey Summary Table

Stage	User Action	System Response	Emotion	Opportunity
Awareness	Searches for help	N/A	Frustrated	SEO / Referral
Discovery	Opens app URL	Landing page loads	Curious	Clear UX
First Use	Types problem text	Input validated	Tentative	Privacy assurance
Detection	Clicks "Detect"	Emotion + confidence	Surprised	Empathetic response
Guidance	Reads AI response	5-section guidance	Relieved	Structured layout
Continued Use	Returns to app	History shown	Confident	Trend analytics
